Sumanta Sahu

Software Engineer @ Softdel | Building Scalable SaaS Platforms
Pune City, Maharashtra, India

Summary

Full Stack Engineer with 4+ years of experience building scalable SaaS platforms, enterprise web applications, and AI-powered automation systems. Specialized in Angular (v15+), Ionic, TypeScript, RxJS, NgRx, Node.js, and microservices architecture. Currently working as a Software Engineer at Unidel, building and maintaining cross-platform app and web solutions using Angular and Ionic. Presently contributing to Mechoshade, an IoT-based Building Management System (BMS) that automates and controls window shading across smart buildings — working across both frontend app development and backend/API integration to connect real-time device data with a seamless user experience. Previously, I've delivered high-impact products across HRTech, Industrial IoT, and customer operations platforms: Built AI-enabled hiring workflows that automated candidate screening, reducing HR effort by 90% Developed real-time dashboards and data platforms for device monitoring, analytics, and operational decision-making Improved complex frontend workflows using Angular state management, increasing reliability and UX across large-scale applications Hands-on experience with Docker, Kubernetes, AWS, Jenkins, SQL, MongoDB, OpenAI API, n8n, and workflow automation tools. I bring a strong focus on clean architecture, performance optimization, and maintainable code — always aimed at solving real business problems through technology. Open to opportunities in: Angular Developer IONIC Developer Full Stack Developer AI Engineer Product Engineering Roles Remote / Global Opportunities

Experience

Softdel
Software Engineer
May 2026 - Present (4 months)
UNIDEL, Pune District, Maharashtra, India

At Softdel, I played a key role in developing MechoSAHDE, a client-focused Building Management System. My contributions included enhancing UI and frontend development, implementing automation features, and integrating various services to create a robust application. I gained valuable experience in cross-platform mobile development and strengthened my understanding of building operations and IoT-enabled infrastructure.

Vision Waves

Software Engineer

August 2022 - April 2026 (3 years 9 months)

Indore

Engineer building scalable SaaS platforms across HRTech, Industrial IoT, and enterprise operations systems. Responsible for frontend architecture and cross-functional product delivery.

- . Built and owned frontend architecture for an AI-powered HRMS platform that automated candidate screening, evaluation workflows, and hiring operations, reducing manual HR effort.
- . Developed real-time dashboards and analytics systems for Industrial IoT platforms enabling live device monitoring, operational visibility, and faster decision-making.
- . Engineered scalable full-stack modules using Angular, TypeScript, Node.js, SQL, MongoDB, improving platform performance and maintainability.
- . Refactored complex user workflows using RxJS + NgRx, eliminating race conditions and improving reliability across enterprise-scale applications.
- . Built interconnected enterprise systems covering customer care, case management.
- . Worked directly with clients and stakeholders to gather requirements, convert business needs into sprint deliverables, demo releases, and iterate quickly.
- . Mentored junior developers, improved code review standards,

Education

Biju Patnaik University of Technology, Odisha

Bachelor of Technology, Computer Science · (2018 - 2022)

KMBB College of Engineering and Technology, Bhubaneswar

Bachelor of Technology - BTech · (August 2018 - June 2022)
